SECURE SATELLITE FAX SYSTEM

When connected to **Thuraya Satellite Phones** and regular fax machines or MFP units the **Patented** (U.S. Patent S6,430,691) **CopyTele USS-900** provides high-grade real-time fax encryption. The **USS-900** is so flexible, diverse, portable and easy to use why would anyone allow their personal and private communications to be faxed unprotected. In this day and age, government, business and personal communications need to be kept confidential, encrypted information can not be decrypted and read by an unauthorized person.

The **USS-900** contains the communication technology of **CopyTele, Inc.** and utilizes the ultimate digital encryption algorithm of the day the **Citadel™ CCX** developed by the **Harris Corporation**. Utilize your standard Group III fax equipment or MFP, no need to purchase costly digital fax products, memory and dialing features are supported by this compact and portable security system that is very easy to operate.

The **USS-900** received the Product Achievement Award for Business Services in 2000 as recognized by the Security Industry Association.
